

**Two versatile forms of phosphorous.
Two different ways.**

BLACK LABEL[®] Zn

BLACK LABEL[®] Zn (8-11.5-0 1.0) is a proprietary nitrogen and phosphate formulation complexed with 7.1% organic acids proven to provide outstanding mobility, availability and efficiency resulting in higher yields, improved crop quality and outstanding ROI.

- **SUGGESTED SOIL:** Use on Low Organic Matter, High pH, Calcareous Soils, Saline & Sodic Soils
- **RATES OF APPLICATION:** 10-20 litres per hectare or 5 Litres per hectare as a foliar application
- **CONTAINS:** 7% Organic Acids plus Orthophosphate and 1% Zinc Sulfate
- **SUGGESTED CROPS:** Row Crop, Broadacre, Hort & Pasture Markets
- **COLOUR:** Very Black

PILLAR[®]

PILLAR is a 9-9-3 with ACA technology (Zinc Ammonium Acetate). PILLAR is a low salt, seed safe, in furrow starter fertiliser with a complete micronutrient package. These ingredients provide essential nutrients at planting time for early seedling vigor, plant health and increased crop yields.

- **SUGGESTED SOIL:** Use on heavier, clay soils
- **RATES OF APPLICATION:** 15-25 litres per hectare or 5 Litres per hectare as a foliar application
- **CONTAINS:** Blend of poly & orthophosphate, 1.21% Zinc Ammonium Acetate & Micronutrients
- **SUGGESTED CROPS:** Row Crop Broadacre Hort & Pasture Markets
- **COLOUR:** Clear green

Black Label Zinc and Pillar are both:

- Low in salt index
- Contain a zinc component
- Crop Safe
- Applied as a starter fertilizer or foliar to correct Phosphorous deficiencies
- Excellent crop safety on seed
- Applied as an in-furrow or pop-up fertiliser, in a 2x2 band at planting or can be applied foliar or post-emergence on crops to give plants an added boost prior to the reproductive stage
